Flying Fisherman® Pago Added to RhinoLens™ Sunglass Series

Large Frames Add Coverage and New Colors Add Style

Islamorada, Florida Keys – Dec 2010. One of the new additions to the Flying Fisherman® Master Angler polarized eyewear collection for 2011 is the **Pago**. The generously sized wrap frame has a hard core angler feel and unbeatable coverage. Sturdy TR90 frames have extra wide temples to block out side glare, with shatterproof RhinoLenses™ lenses that are 35 times stronger than CR-39, won't break like glass – the ultimate protection in a world of flying hooks, lures, and debris from the environment. They also eliminate glare, provide perfect optical clarity, and 100% UV protection.

The Flying Fisherman® AcuTint™ lens system enhances color contrast without distorting natural color, so you can spot fish and structure below the water's surface. The Pago is available in Matte Black/Smoke, Crystal Tobacco/Amber, and Shiny Black/Vermillion lenses, come with a micro fiber case, and are value priced at just \$59.95 MSRP.

All Flying Fisherman® products, along with testimonials, a dealer locator and more can be seen at www.flyingfisherman.com.
