FLYING FISHERMAN ROLLER AND SLACK SUNGLASSES

FLYING FISHERMAN

ROLLER AND SLACK SUNGLASSES

Flying Fisherman has introduced two new wraparound frames into its impressive collection in the shape of its Roller and Slack models.

The Roller is a medium to large, square-wrap frame that features a trendy lightweight design and generous polarised coverage.

The Slack is a sporty, small to medium-fit wrap frame that has good coverage to block out peripheral light.

Both frames are available with Flying Fisherman's impressive Acutint lens technology and numerous colour options.
