**Flying Fisherman® Spector is New for 2010**  
**Triacetate Lenses Offer Exceptional Quality at Value Price Point**

*Islamorada, Florida Keys.* The *Spector* is the latest addition to the Flying Fisherman® 2010 Action Angler Collection of value priced polarized eyewear. Wraparound styling and extra wide polarized lenses make them especially functional for fishing and boating. The sleek TR90 composite frames are durable, lightweight, and built for comfort -- with vented, non-slip nose pads, a vented brow pad to prevent lens fogging, and flexible grip-tip temples for a stay-put fit.

The Spector features polarized triacetate lenses that are hard coated for superior scratch resistance, and provide 100% protection from harmful UVA and UVB light. Along with knocking out the reflected glare that causes eye strain and fatigue, the Flying Fisherman® AcuTint™ Lens Color System enhances color contrast without distorting natural color, for sharper optics and enhanced ability to spot fish and other structure below the water. The Spector is offered in shiny black frames with silver flash-mirrored, smoke lenses or shiny black frames with silver flash-mirrored, amber lenses. And, they're one of 28 styles in the collection retailing for under \$28.00 US.
